

# IAU XXVI<sup>th</sup> General Assembly

Prague  
14–25 August 2006

## INVITED DISCOURSES

Jill Tarter:

*The Evolution of Life in the Universe*

Alan Title:

*The Magnetic Fields and its Effects on the Solar Atmosphere as Observed at High Resolution*

Shuang Nan Zhang:

*Similar Phenomena at Different Scales:  
Black Holes, Sun, Supernovae, Galaxies and Galaxy Clusters*

Reinhard Genzel:

*The power of new experimental techniques in astronomy:  
zooming in on the black hole in the Center of the Milky Way*

## SYMPOSIA

No. 235

*Galaxy Evolution across the Hubble Time*

No. 236

*Near Earth Objects, our Celestial Neighbors:  
Opportunity and Risk*

No. 237

*Triggered Star Formation in a Turbulent ISM*

No. 238

*Black Holes: from Stars to Galaxies – across  
the Range of Masses*

No. 239

*Convection in Astrophysics*

No. 240

*Binary Stars as Critical Tools and Tests in Modern  
Astrophysics*

17 JOINT DISCUSSIONS

7 SPECIAL SESSIONS

MEETINGS: YOUNG ASTRONOMERS  
WOMEN IN ASTRONOMY
